

How To

Service Documents from APPI

Document: #HT000016

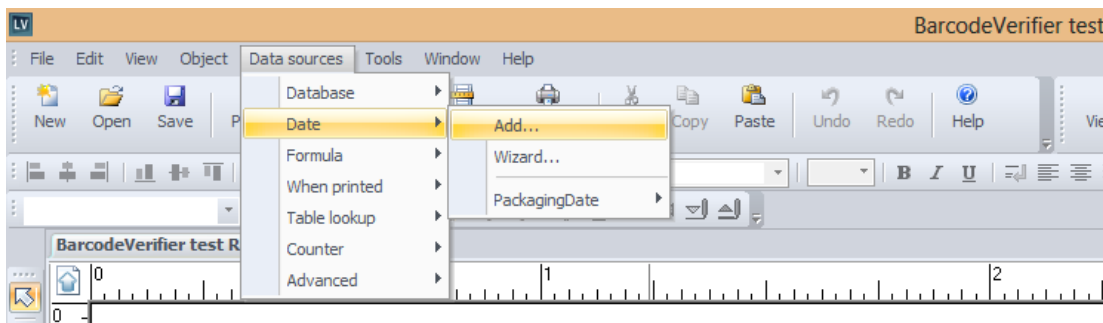

Document Title: Use Date Fields to Display Customized Dates

Product(s): Ti-1000Z

Procedure:

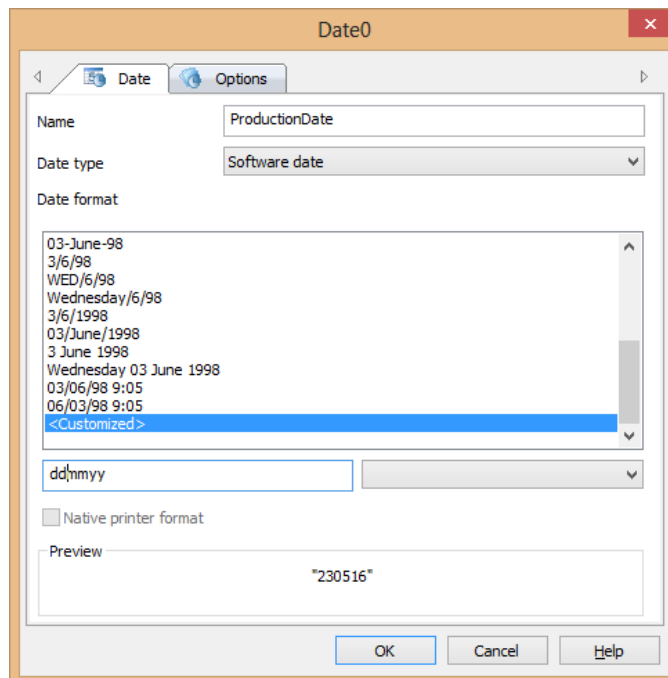

This procedure will add automatic Lot number and expiration dates.

In Data Source – Date: Click “Add”

In the Date window: Set it up according to the following picture.

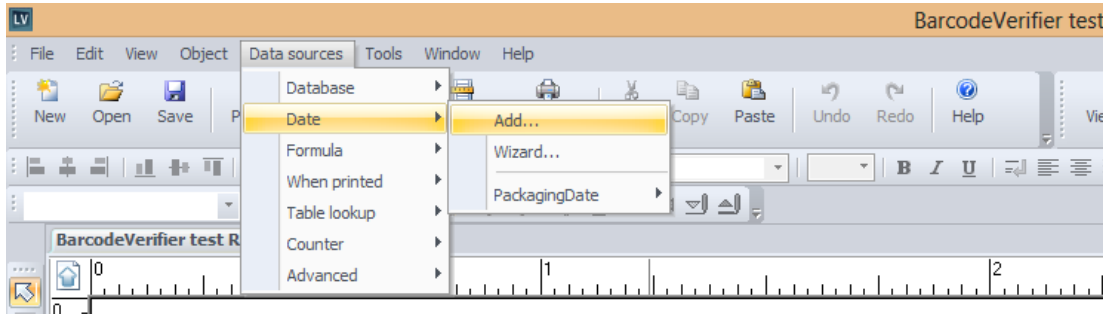

Note: “ProductionDate” is only a suggestion; the Name can be anything.

Service Documents from APPI

Again, in the Data Source – Date: Click “Add”.

In the Date window: Set it up according to the following picture.

Note: “ExpirationDate” is only a suggestion; the Name can be anything.

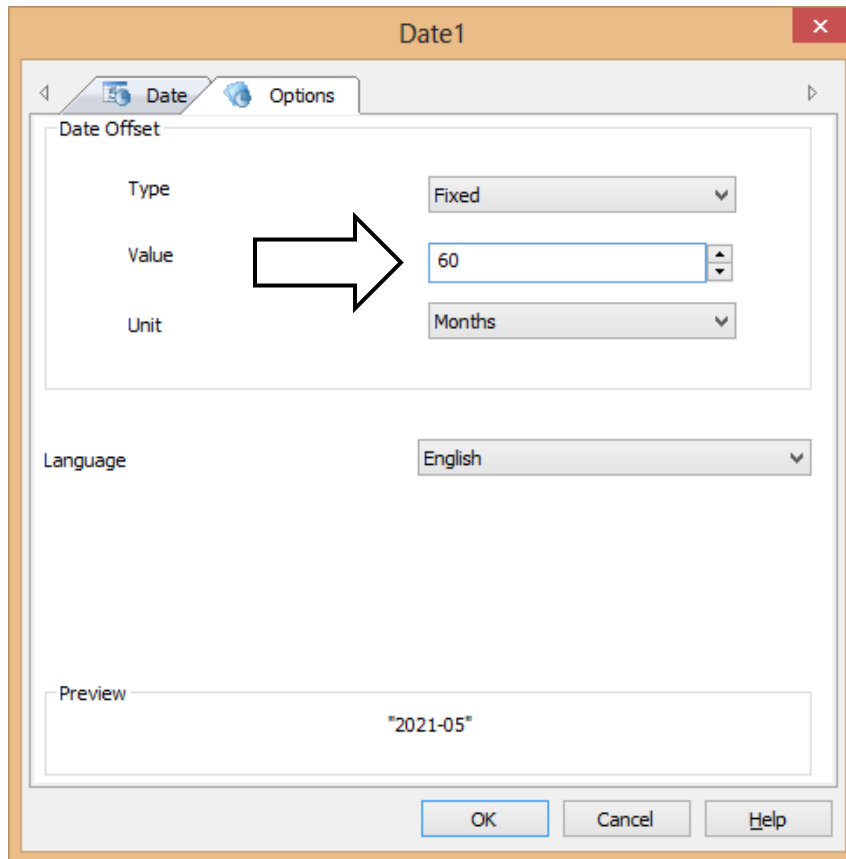

Next, click the “Options” tab.

How To

Service Documents from APPI

In the Date Offset, the largest unit available is “months”. Therefore, if the desired period is, for example, five (5) years, enter sixty (60) months.

Scroll Right on the page to the “Data Source”.

How To

Service Documents from APPI

For each text field, in Properties:

Change the Data Source to “Expiration Date” for the expiration date, and
“Production Date” for the Lot number.
