

Document: #HT000015

Document Title: Use Click Print

Product(s): Ti-1000Z

Procedure:

Click Print is a feature found in every version of Labelview. Use Click Print to print labels directly without going into the label editor, eliminating the possibility of accidentally changing the label design.

To set up Click Print, locate the ClickPrint.exe file, usually located in:

C:\Program Files (x86)\Teklynx\LABELVIEW 2015\Tools\Click Print

Note: LABELVIEW 2015 is the version number, and the year may be different on your computer.

How To Service Documents from APPI

Right-click on the file, and select "Send To" > "Desktop (create shortcut).

Click on the shortcut, and the "Splash Screen" appears while the program loads:

The Click Print screen (below) contains previews of your labels. Note that in the address bar, you can change the directory where your labels are stored, either on your computer or on a network drive.
