

How To

Service Documents from APPI

Document: #HT000110

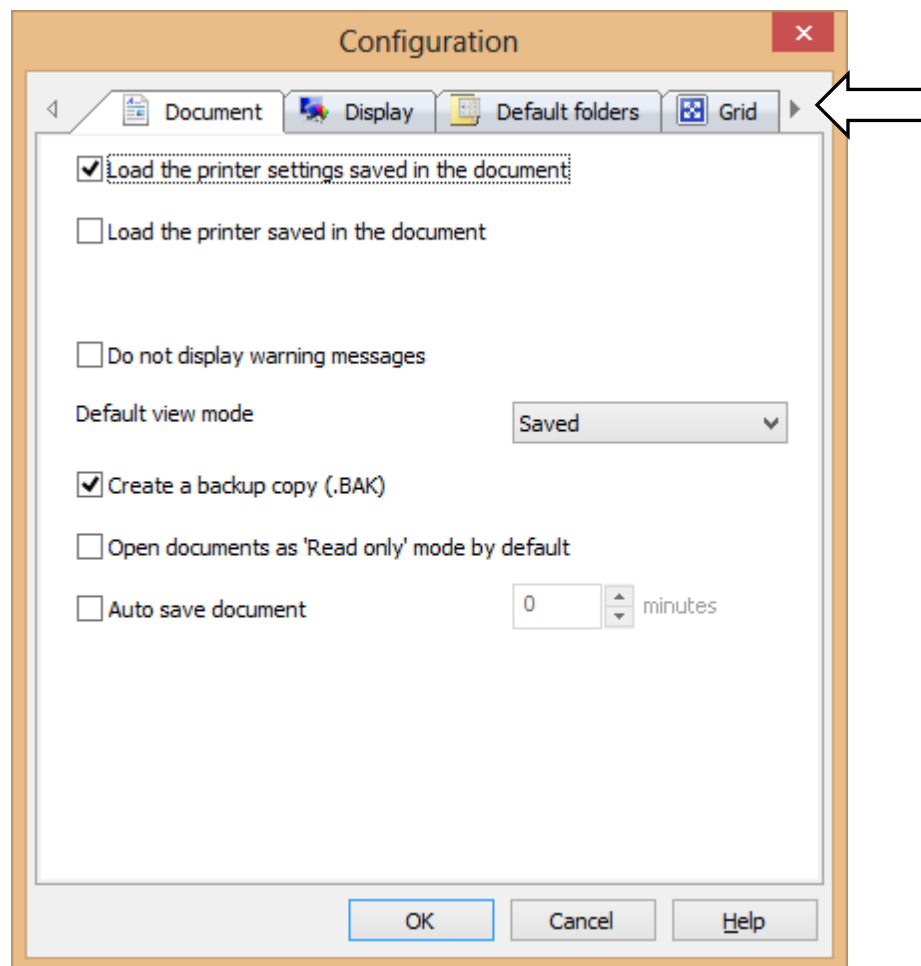

Document Title: Labelview Configuration

Product(s): Ti-1000Z

Procedure:

This procedure is applicable to Labelview Version 10.02, 2012 – 2014.

Open Labelview. In the **Configuration** window, click the arrow to the right of the **Grid Tab** to display the **Printing Tab**.

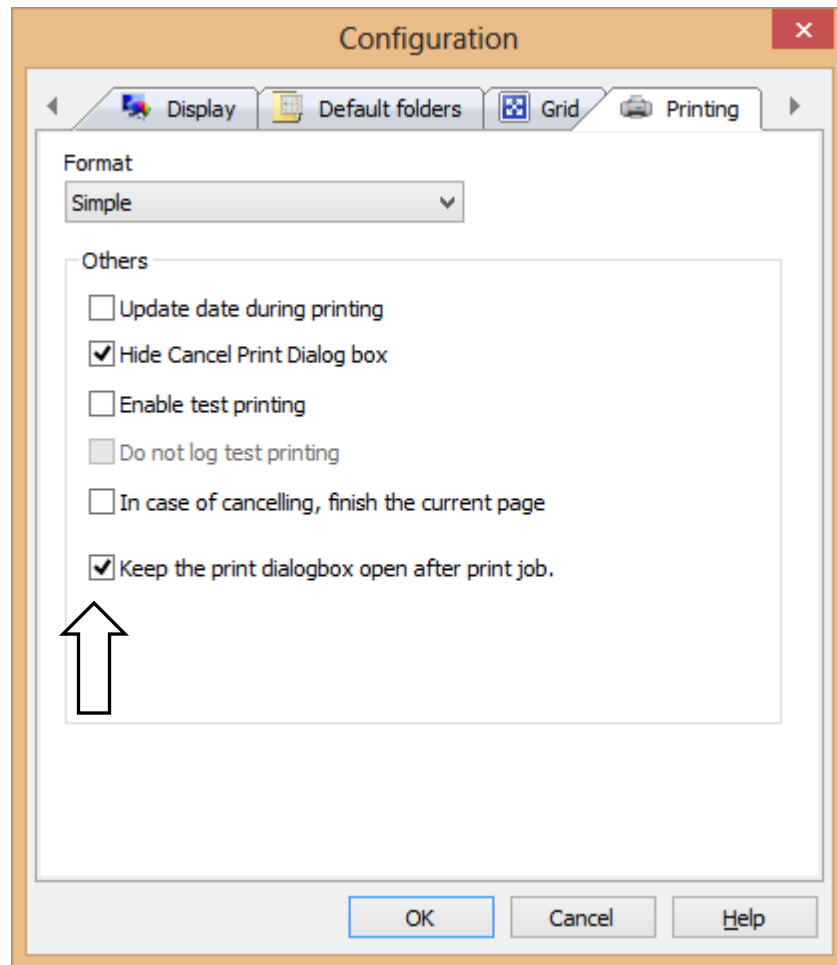

How To

Service Documents from APPI

Select the **Printing Tab**, and make sure the “**Keep the print dialog box open after print job**” box is checked.

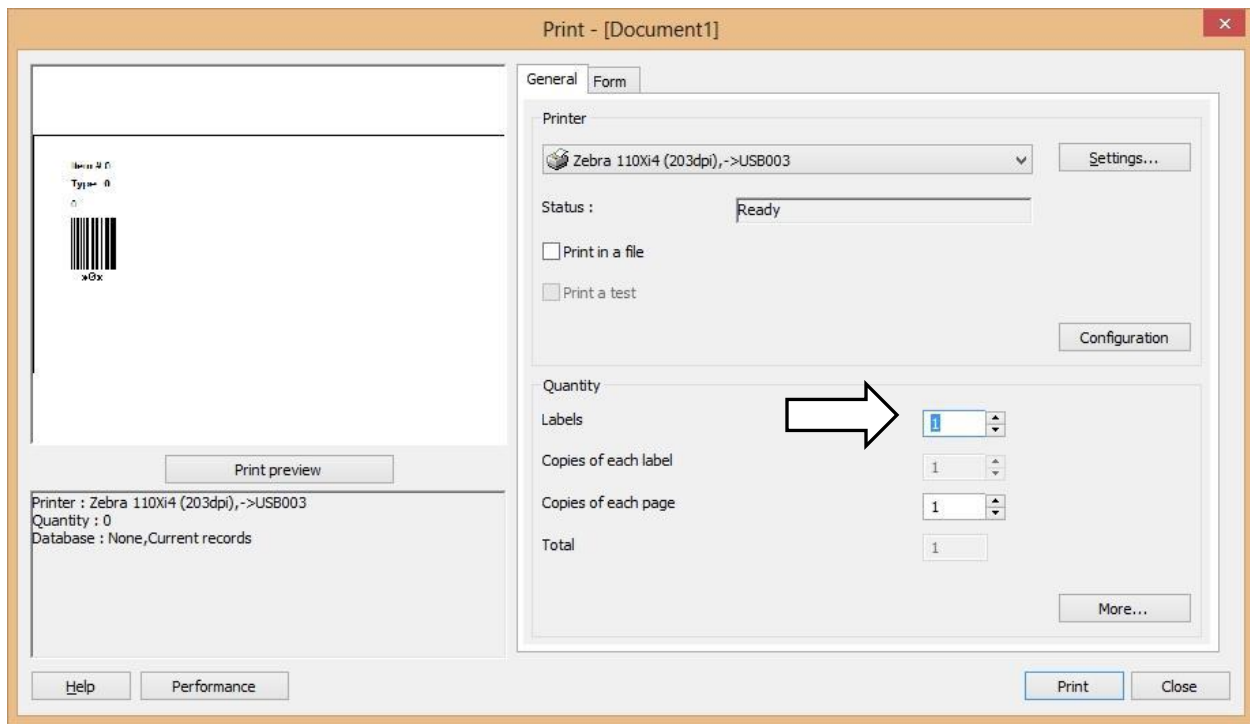

Once printed, this form stays up on the screen, and the printing process can be repeated.

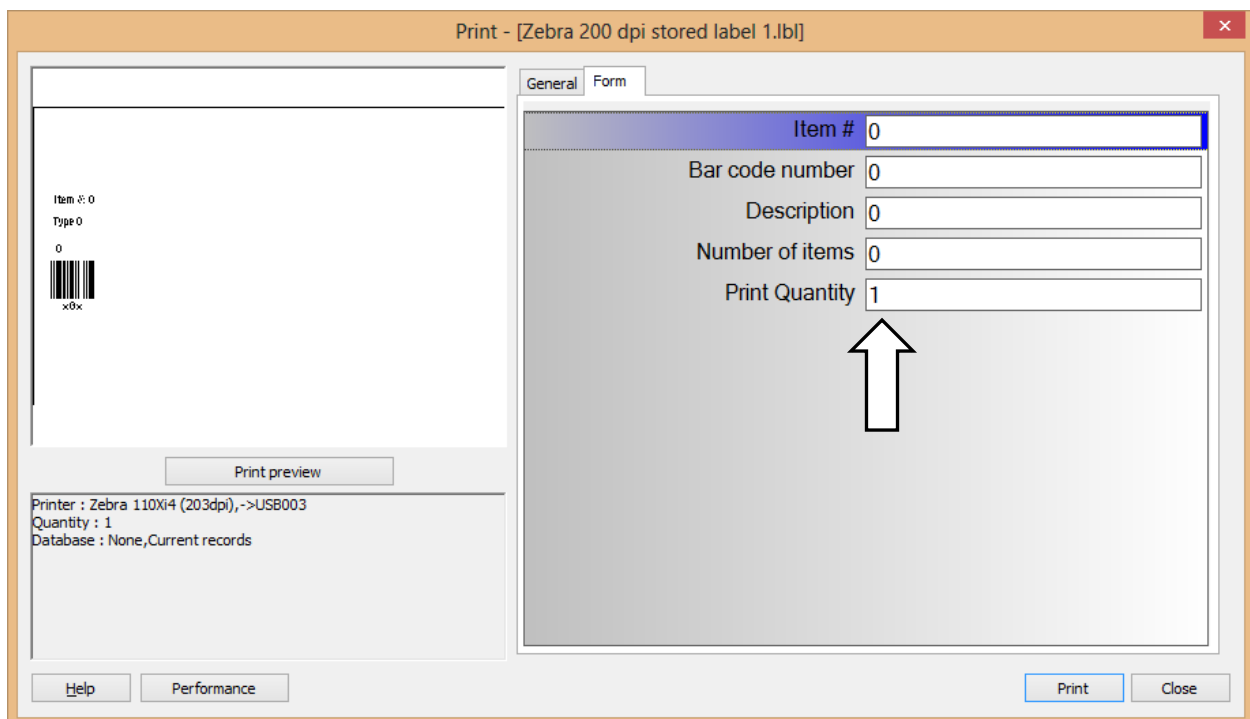

How To

Service Documents from APPI

If the **Print Quantity** field is not set up in this form, the number of labels can be entered under the General form (below).
