

# How To

## Service Documents from APPI

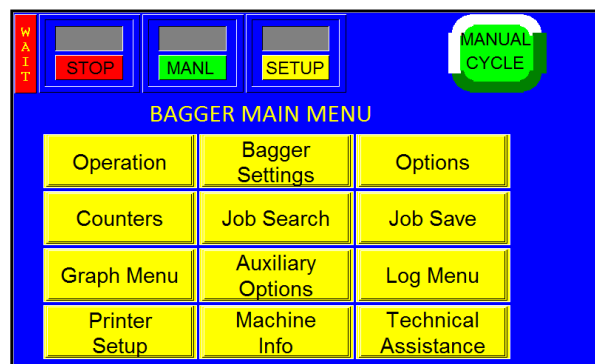

**Document: #HT000148**

**Document Title: Adjust Seal Temperature**

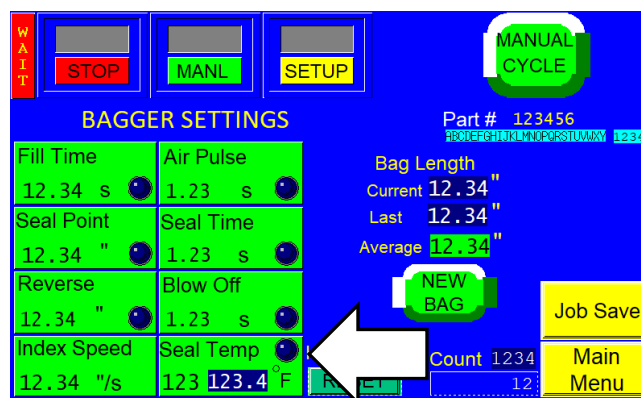

**Product(s): ST-1000**

**Procedure:**

From the Bagger Main Menu, select “Bagger Settings”.

All settings will be entered numerically on a keypad. Press the green “Seal Temp” button, then enter the value on the number keypad followed by the <Enter> button.

The typical temperature setting is between 360°F and 440°F (182°C to 226°C) depending on film thickness.
