

Roll-a-Print™ Print Stations

Ti-1000Z Roll-a-Print “Fast” Printer

We should have called it our Ti-1000Z “Speedy Gonzalez” Roll-a-Print. Using Zebra print technology and Advanced Poly feeding and registration technology, the newest and fastest of our Roll-a-Print series can print up to 80 bags per minute. Bags feed continuously through the print head at 10” per second for outstanding print quality.

Special Features:

- Perforation or photo optic registration system for precise thermal print registration
- Perfectly integrated with the T-1000, the Ti-1000Z RAP is operated from a single touch screen that also controls the bagger.
- 203, 300 or 600 dpi print resolution available
- 4”, 5” or 8” wide print heads available
- Film accumulator for continuous feeding and tension control
- Full color touch screen/PLC operation with alarm outputs
