## Ti-1000Z “Replacement” Promotion is BACK, better than before!

Printer technology may become outdated and wear out, but your T-1000 is sure to have lots of miles left on it!

Toshiba (TEC) printers (driver in our model Ti-1000) have been discontinued for several years and APP has scoured the world to purchase as many replacement parts as we can find but they are running out fast. So, we are close to calling it quits on the Ti-1000 (TEC) printers simply because of lack of available TEC parts. However, your T-1000 bagger will be supported for years to come with no expected end of life issues. Advanced Poly will continue to fully support all versions of the T-1000 even those machines produced over 20 years ago!

As an incentive to upgrade your printer, Advanced Poly is offering our latest Ti-1000Z printer (with “industrial series” Zebra xi4 driver) at discounted pricing. This model is a “drop in” replacement with minimal work required to swap it over. In fact, we are quoting this printer replacement without the need for installation.

Advanced Poly is also offering a discounted preventative maintenance service on your existing equipment if you were to return it for service and installation of the printer. We will not charge for swapping the printer and will provide a fixed cost (discounted rate and fixed hours) for the PM work. We will also discount all parts required to bring the unit back to tip top condition.

### Printer Pricing/Discounts

- Price for new Zebra Replacement Printer \$13,950
- Ti-1000ZR promotional discount (\$500)
- Trade-in allowance of your Ti-1000 TEC printer (\$500)
