

# Document: #HT000194

# **Document Title: Scale Filter Set-Up for Digital Load Cells**

# Product(s): US-4000 Rotary Check Weight Scale

## **Procedure:**

Setting the Scale Filters will help the scale to maintain a Zero weight when the scale is empty.

Go to the Main Menu and press the Yellow Technical Assistance Button.

R A D MANL AUX CYCLE, SCALE MAIN MENU					
	Scale Scale Box Operation Settings Setup				
	Box Operation	Job Search	Job Save		
	Counters	Graph Menu	Log Menu		
Machine Technical Assistance				<u> </u>	

## Enter the Code 1001

Press the Yellow APPI Button.

#### Enter Code 9001 on the Keypad

#### Press the Yellow Scale Configuration Button

		CD	EFGHI.	TKLMNO		<u>123</u>
STOP	Decimal		Read Weigh	t Serial No	TAC	
	Save	DP	Baud Rate	Firmware	Reset	
Filter Mode	IIR=0	(0)	Write	Status		
Filter Level	0	(7)	Write			
Update Rate	0	(4)	Write		Sc	ale COM
No-Motion	0	<mark>(4)</mark>	Write			Scale
Stable Time	0	(1000)	Write	Save Filters	Ca	alibration
Resolution	1		Write	Soft Reset	F	Scale Factory

The LED light will not be Green on the Scale Configuration Screen.

Press the Yellow Scale Com Button.

The LED light should be Green on the Scale Comm Screen.

If the LED light is not Green press the Red Stop Button and the Red Comm Button. The Red Stop Button should toggle to Green Start and the Red Comm Button should toggle to Green COMM. The LED light should light Green.

Press the Yellow Scale Configuration Button.

In the Scale Configuration Screen there are here (3) columns; the First Column is the Read Column; the Second Column is the Set Column, and the Third Column is the Write Column.

	ABC	DEFGHI	JKLMNO		
Read	Set	Write	t Serial No	TAC	
Ţ	S ve DP	Bau Rat	e Firmware	Reset	
Filter Mode	IIR=0 (0	) Write	Status		
Filter Level	0 (7	) Write			
Update Rate	0 (4	) Write			ale COM
No-Motion	0 (4	) Write			
Stable Time	0 (10)	<sup>00)</sup> Write	Save Filters	Ca	libration
Resolution	1	Write	Soft Reset	F	Scale actory

Press the Filter Mode Button under the Read Column.

The Value that is set in the program will be displayed in the Display Window.

	ABCDEFGHIJKLMNO						
P	Decimal	Read Weight	Serial No				
	1	ſ					

Filter Mode should display IIR=0 or 0 as in the parentheses to the right of the Write Column.

	Save	Baud Ra	
е	IIR=0	<mark>(0)</mark>	—₩rite
:I	0	(7)	Write

If the Filter Mode value displayed is not IIR=0 or 0; use the Set Column (Middle Column) Button to adjust the value to IIR=0 or 0.

After the Filter Mode value has been adjusted to IIR=0 or 0 press the Write FM Button under the Write Column.

Press the Blue Save Filters Button.

	vvnie		Scale
<mark>(1000)</mark>	Write	Save Filters 📛	Calibratio
Ï	Write	Soft Reset	Scale Eastory

To confirm that the new value has been saved into the program press the Filter Mode under the Read Column and the new value of IIR=0 or 0 should be displayed in the Display window.

Repeat the above steps for each Button under Scale Filter Set-Up.

The values for each button should be adjusted to match the value in the parentheses.

The Resolution Value is based on the digital Load Cell rating:

5kg to 10kg load cell would have a Resolution of 1 20kg load cell would have a Resolution of 2 40kg load cell would have a Resolution of 5

If the Resolution value was changed, the Scale will have to have the calibration procedure performed to save the change in value in the program.

NOTE: Pressing the Blue Save Filters Button will NOT save the Resolution new valve to the program.

Press The Yellow Scale Calibration Button

### To Start the Calibration process, press the Green Start Calibration. Follow the prompts in the display window. They are as follows:

STOP	RUN				
f12345.6	ZERO				
Press 'START CA	Press 'START CALIBRATION' to begin				
			Scale COM		
	NEW ZERO	Calibration Weight 12345 g	Scale Configuration		
	SAVE	CANCEL	Scale Factory		

STOP	45 6	CALIBRA		AN YC		
1 1 2 3	4 <b>5.0</b>	ZERO				
Clea	aring Scal	leWait.	Wait			
Clearing Coole	START CALIBRATION	NEW ZERO	Calibration Wei 12345 g	ght g	Scale Configuration	
		SAVE	CANCEL		Scale Factory	

#### Press the Green New Zero Button when prompted.

Place a Calibration Weight on Scale, Touch Calibration Weight Button when prompted.

Enter Calibration Weight on Keypad and press Enter on Keypad. The weight displayed should equal the calibration weight.

### If the weight displayed is correct, press the Green Save Button. If it is incorrect, press Cancel to restart the calibration.

The Scale has now been calibrated and the Resolution Saved.
