Re: UV Performance of Film Sample

Dear Mr. Neff:

This letter is being sent to communicate the UV performance of the film sample you provided to Ampacet. This sample was marked "film sample A", which was approximately 4.2 mils in thickness.

Testing via UV-Vis Spectroscopy showed 0% light transmission in the UV range all the way up to 395nm. This means you have 100% protection all the way up to the visible light range. The associated transmission chart is attached below for your review.

Please let me know if I can do anything further for you in this matter.

Sincerely,

Morgan L. Gibbs
Director – TS&D
Ampacet Corporation

Cc: Ken Diblasi
